

INSPIRATION FOR

THE PERFECT SIGN

Getting started

Think about free opportunities – what have you got in the shed and who do you know who's got a creative streak? There's no need for mega bucks to make great signage – as some of these examples show. And asking a local artist or business to help out might result in some great new connections for your group.

Digging deeper

If you've got a bit of a budget, then you might ask a designer to make you something. If you don't already have an official Incredible Edible logo, [get in touch](#) and we can send you one. You can give the designer our [brand guidelines](#) so they can create a truly Incredible sign for you.

We'd like to thank all the groups featured in this document for the photos which are all available online. Enjoy seeing how some of our Incredible Edible groups make the most of their signage...
